FUND

Whether you represent a public authority, its procurement body or its catering services, or you are a sustainability-oriented citizen, the **StratKIT Final Conference** will present you with sustainability trends in the Baltic Sea Region (BSR) and numerous tools introducing innovative measures towards more sustainable public procurement and catering services.

The StratKIT-project (Interreg BSR, 2019-2021, www.stratkit.eu, @StratKIT) joins together 13 partners and 10 associated organisations across the BSR.

This online event summarises the project's results, launches the Sustainability Toolkit and looks into the future aspects of a sustainable public meal.

The conference will be held in English with translation into Polish and Russian. The registration for the event will open in September.
